

# The Perfect Peel® Superblend

## THE PERFECT PEEL® *Superblend*

The Perfect Peel® Superblend is a medium-depth, hybrid chemical peel, based on the master antioxidant Glutathione. It combines Glutathione with Kojic Acid, TCA, Pure Retinol, Resorcinol, Salicylic Acid, Vitamin C, Mandelic Acid, Lactic Acid and Azelaic Acid blended at low-percentages, to produce incredible and safe results. The Perfect Peel® Superblend requires no period of skin preparation and can be used on all Fitzpatrick types.

The Perfect Peel® Superblend works from the outside AND inside to repair and nourish the skin, refine pores, improve skin hyperpigmentation, lift melasma, diminish fine lines, improve acne and acne marks.

To follow The Perfect Peel® Superblend you are given an individual Home Kit. This pack consists of detailed instructions, as well as a potent post-treatment ABC Serum, containing Retinol, Salicylic Acid and Vitamin C, which is to be applied at home the night of the treatment. It also includes a 15ml version of our 5-a-Day healing and moisturising cream, which can also be bought separately.
